CPG(16)NOM02

Nomination of M. Weber

14-1250

18.03.2016

Dear Alexander,

In response to your call for nominations for chairpersons of CPG19 Project Teams, Germany would like to nominate Mr Martin Weber from the Federal Network Agency (BNetzA). A brief curriculum vitae is provided in the annex.

Martin gathered most of his experience on international frequency regulation in the area of maritime, aeronautical and radiodetermination communications. His longstanding engagement in ITU-R WP5B, where he serves as working group chair of the aeronautical group, might be taken into account here. His role as Chapter Rapporteur on aeronautical, maritime and radiolocation issues of the CPM Report to WRC-15 could be noted as well. Finally credit is deserved for his service as PTC chairman in the preparation for WRC-12.

He will, if selected as a chair of a Project Team, be fully supported by the German Administrations during this task, provided by all necessary resources to enable him to serve in the role as PT chair.

Yours sincerely

Thomas Ewers

## Mr Martin Weber

---

### Profile

Mr Weber finished his study of telecommunication in 1986. After some years in the monitoring service he started working in the national and since 2000 in the international spectrum regulation. His responsibilities cover strategic frequency utilisation concepts and the transposition of those to the international level of CEPT and ITU. Doing this and having active in the preparation of three WRC's national and on CEPT and ITU level, Mr Weber participated in a number of international groups, partially as head of the German delegation. He has also chaired several groups and subgroups in ITU and CEPT. From 2010 to 2012 he served as Chairman of CPG PTC. After WRC-12 Mr Weber was appointed Rapporteur for Chapter 3 on aeronautical, maritime and radiolocation issue of the CPM Report to WRC-15.
